At the onset, the chairman welcomed the members of BOS & placed the agenda of the meeting.

In meeting it was discussed that, as the PG-NEET aspirants are not opting Preclinical subjects like Anatomy, Physiology & Biochemistry, so, it is important to build a strong foundation of Non-Medical students, like Medical M.Sc. in different subjects.

As we are running Medical M.Sc. in different courses in our university, we still are of the view that at graduate level also, there should be some strategy, so that students are attracted towards a particular subject.

To overcome this, we propose the introduction of Medical B.Sc. Anatomy (a three year regular) course, to form the strong foundation of future Medical professionals. This Board of Study mainly concentrates on this very peculiar and attractive course to be started in our university.

The suggestions on following topics were given by the members of BOS about the curriculum & Syllabus of B.Sc. (Medical Anatomy):

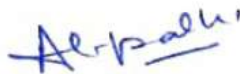

1. Objectives of course
2. Internal evaluation method
3. Question paper model
4. Syllabus (theory and practical) of BSc. (Medical Anatomy) 1st, 2nd and 3rd years

The study and internal evaluation scheme proposed by the members of BOS is enclosed which needs further consideration by the University.

The meeting ended with vote of thanks to Chair, External and Internal experts.

- what so ever i found the material for
Board of studies is very adequate, in addition
i suggest hospital visit from 2nd year onwards
to enhance the subject knowledge because
ultimately they are going to teach medical
students. -
