The University has earned international fame in the area of medical science, dentistry, management, and engineering education. Students from all across the world are enrolled here for higher education in various disciplines.

MESSAGE BOARD

Chancellor's Message

It has been my long cherished dream and earnest desire to contribute to the nation's development and bring about social transformation through education. TMU is dedicated to groom the future technocrats & business leaders. Students are trained to think deeply and rigorously to confront the problems in hand with all the relevant information available.

Suresh Jain

Group Vice Chairman's Message

I feel educational institutions are the means to develop human capabilities for leading a meaningful personal and professional life, thus help nations to develop. At CCSIT, we take tremendous pain to make our students creative thinkers and problem solvers so that they can shape the destiny of the nation.

Manish Jain

Vice Chancellor's Message

The success of educational system hinges on proper planning, efficient administration, adequate financing and effective evaluation system. I call upon all the students who are going to join various programs at our University, to strive hard to gain knowledge, transform it into skills with right attitude and inculcate the habit of learning, which will drive them to self directed learning.

Prof. Rakesh K. Mudgal

Principal's Message

Greetings! We at College of Computing Sciences & Information Technology (CCSIT) Teerthanker Mahaveer University Moradabad, extend a hearty invitation to all our recruiting partners.

The relationship between Engineering institutions and industry is highly synergetic. Since the primary objective of students in pursuing higher education in the area of Computer Science, Computer Engineering and Computer Applications is to get a good job on the completion of their studies, the institutions need the support of industry to help the eligible students in their final placements. On the other hand, the industry looks towards institutions for their requirement of qualified and trained software professionals. Thus, it is in the interest of both Industry & Institutions to develop strong cooperation, which can be a win-win situation for both and will also be beneficial to the students.

We want our students to be corporate ready professionals and this has been the guiding principle for us at CCSIT. Hence, we conduct extensive Employability Enhancement Training Programs designed to

develop professional skills and provide value-added training and certifications in their respective domains. They are also getting exposure through practical aspects of the industry via guest lectures, industrial visits, internships etc.

CCSIT highly appreciates the confidence reposed in us and the invaluable support extended by our recruiters over the years. We are eager to know the experience and expectations in terms of required skill sets. We would be happy to partner with our recruiters in upgrading the skills of our students as per specific industry needs, so that they can be productive from the first day and be the preferred choice for hiring. CCSIT TMU Moradabad is committed to ensure the best recruiting experience and we assure you of our best efforts. Happy hiring!

Prof. Rakesh Kr. Dwivedi

About CCSIT

The Teerthanker Mahaveer College of Computing Sciences and Information Technology came into existence in the year 2014. The college was established by the university with the aim of providing relevant, essential, upgraded education to the young aspirants in the field of computer science and engineering, including computer applications. In recent times and the years to come there will be increasing demand of skilled manpower in the domain of Computer Science and Engineering because of the 'Digital India' mission projected around the globe by the Government of India.

The College of Computing Sciences and Information Technology is the center for all Computer Science related programs run by the university as per the standard UGC norms. The college prepares young engineers to acquire essential knowledge about technological skills that allow them to independently conceptualize, design, develop and implement Computer Applications fulfilling the Software demand for the world. The college offers wide range of academic programs at undergraduate, postgraduate and doctoral level to cater to the needs of corporate world. The college has adopted effective teaching methodologies. The curriculum is periodically updated by the Board of Studies, to provide upgraded technological knowledge and skill set to the students. There exists a flexible credit system that enables the students to acquire relevant knowledge and skill. Student's participation in workshops, seminars, conferences and various co-curricular activities are an essential component of the learning pedagogy. Eminent academicians of repute, renowned scientists and researchers are invited for interaction and knowledge sharing with the students. The college is supported by competent and experienced core faculty with expertise in various areas of Computer Science and Applications.

Training & Placement Cell (T&P CELL)

The CCSIT Training & Placement cell works all through the year towards generating placement and training opportunities for the students. Reputed industrial houses across the country visit our College regularly for the campus recruitment programs. The prime objective of the division is to facilitate its graduating students and industry by providing a meeting ground where the prospective employer companies can identify suitable candidates for placement in their organization. To achieve 100% employment of our students and to assist students in securing best available jobs, the T & P cell follows two fold approaches:

By getting the students to be industry prepared.

Inviting companies to the campus and acting as an interface between students and industry by facilitating the selection process of potential employers.

We believe in motivating candidates for a fruitful education career and encouraging them to be self-reliant and skilful. We also conduct pre-placement talk for students of all the batches as regular feature of their curriculum. This helps the students to develop skills like aptitude test, vocabulary test, spoken English, analytical reasoning, group discussion skills and interview skills.

Facilities made available to the students through T&P Cell:-

Arranging campus interviews for final year students for their recruitments.

Arranging guest lecturers of eminent personalities from industry for career counselling.

Organizing workshops on different topics.

Co-ordination for industrial trainings for students.

Arranging personality development programs, including mock interviews, written tests and group discussions.

Elite National Talent Hunt 2019

at your institute.

Sunil Kalachar

(General Manager- Global Campus Hiring Head)

Message From Assistant Director (T&P)

"In the changing global environment, a suitable job is of utmost importance for the graduating students, to facilitate this aspiration of the students we at Teerthanker Mahaveer University have a full-fledged Training and Placement department, which works towards the fulfillment of the student's aspirations of having the best professional career. We provide a comprehensive array of services and support to our students that will assist them in their life-long career development and placement. The department acts as a central hub for the overall development of the student for the final placement and is a storehouse of all information and resources. This Year has seen great achievements in the placement domain with all our students getting good opportunities and some decent placement packages to make them feel confident and happy. My best wishes are with all our placed students."

T&P Cell Activities

The University helps each student in exploring placement opportunities by inviting various companies for campus recruitment of students who are in the final year of various programs and are likely to graduate at the end of the academic year. The final placements, at CCSIT, TMU are a result of very systematic interaction with the industry and continuous career counseling of the students. Right from the beginning of the program, students are continuously counseled with regard to his / her career aspirations and options, which in turn is vigorously followed up with the potential companies for participating in the placement process of the College. This not only helps the students in getting the 'right' job but also assists the visiting placement companies in identifying the 'right' candidate for their organization.

The Broad Activities Undertaken by the Placement Cell are:

Formation of Students' Placement Committees for final placement and also for getting industrial training and industry linked project work for students.

- Communication, networking and relationship building with the potential recruiters
- Invitation to potential recruiters to visit the Institute.
- Continuation of placement activities after the stipulated period, till all the students are placed.
- Grooming and training of the candidates for the placements so that their chances of selection increase.
- General follow-up, joining formalities and other administrative activities.
- Preparation of Placement Brochure.

College Placement Committee

The placement related activities, at the College, are carried out by Placement committee – it comprises of faculties from various departments of the institute. Student representatives from various branches who are in their final year are also appointed as committee members. The committee is headed by Assistant Director Training and Placement. The placement committee is usually formed in the month of July.

Student Registration for Placement

Students who are in their final year and interested in availing placement support from college, will have to register themselves for placement. Those who don't want any kind of placement support need not register themselves.

Student's Messages

Kumar Sri Harsh
B.Tech. (CSE)

Everyone dreams of becoming the best version of themselves and I wouldn't be where I am today without a place like CCSIT by my side. Thank you for turning me into the person that I always wanted to be. My words may not be capable of communicating my sense of gratitude towards everyone that shares the common line in my achievement and success. Thank you.

TMU has been proved to be the best choice I could have ever opted for. My placement in WIPRO affirms this exclusivity even more. Indeed, I am immensely gratified for everything TMU has offered me in my creative career sphere.

CCSIT offers students a number of opportunities when it comes to their personal and professional growth. I am extremely thankful for the college's Training and Placement cell that provided me with such wonderful opportunities to advance in my career as a professional by connecting me to various companies.

Being a part of CCSIT family, I feel very grateful to Principal Sir, Training and Placement Cell Officer and all the faculty members. Due to the efforts of our placement cell, I got selected in Althent Technologies. I wouldn't have gotten this far, without the constant support of the college. I am so pleased that I got good opportunity through our placement cell. Thank you very much for all your assistance with planning our Campus interviews at College of Computing Sciences and Information Technology.

My journey with TMU was very amazing. The course curriculum is up to date with the new technologies in the IT industry that helps us to become ready for the industry. All the faculties are very helpful and knowledgeable and because of their guidance and support. I was able to get job in both TCS and Wipro. I really feel lucky to be a part of TMU.

My three years at Teerthanker Mahaveer university have been excellent and a memory to cherish for a lifetime. The years spent here have been full of learning opportunities that were full of fun and frolic. Due to the efforts made by the faculty and placement cell at CCSIT, I was able to bag job in the two MNC companies that I applied for. They always provided me with the assistance that I required for my overall development and to improve my technical knowledge. I will always be grateful to them for providing me a platform of practical learning and preparing me for the corporate life.
